

Harvard University's Program on U.S.-Japan Relations advances social science research on Japan from comparative, global, and multidisciplinary perspectives. The program sponsors a weekly seminar series, Distinguished Visitor program, conferences and symposia, and other events; hosts Associates and postdoctoral fellows from Japan, U.S., and other countries; and supports the research of Harvard faculty and students. The program's intellectual mandate includes U.S.-Japan relations; contemporary Japanese politics, economy, and society; common problems of developed democracies; civil society in Asia; and international relations of East Asia.
